

WILLBRANDT Rubber Expansion Joint Type 59

■ not in stock

DN 350 to DN 1500

Type 59 is a conical or eccentric rubber expansion joint whose corrugation-free bellow geometry achieves a very low flow resistance. It is suitable for the conveying of media containing solids, even at high flow velocities. Furthermore, it is characterised by the wide variety of rubber qualities, so that a suitable rubber compound is available for every application (see material descriptions on the following page). Due to the design, only minimal compression movements can be absorbed! A deviation in the length is possible in individual cases and after prior testing.

Type 59 is used in plant engineering and in water and wastewater technology. Here it is used specifically for lateral movement absorption, vibration absorption and noise damping.

Bellow design	Smooth conical or eccentric rubber bellow with reinforcement and both sides solid rubber flange or one side solid rubber flange (small side) and one side moulded sealing bead with core ring, self-sealing (no additional seals required). Suitable for backing flanges or swiveling flanges.	Vacuum resistance	Only vacuum-proof with a vulcanised vacuum supporting spiral.
Flange version	On one side a galvanized steel backing flange, on the other, a swiveling galvanized steel flange, drilled according to DIN PN 10 (standard). Other materials and dimensions are possible.	Approvals/Conformity	CE, drinking water conform, FDA and EG 1935/2004 conform. (Detailed overview on page 5.)
		Accessories	<ul style="list-style-type: none"> - Tie rods - Vacuum supporting spiral/rings (vulcanised) - Potential equalisation - Flame-resistant protective covers - Dust and splash protection covers - Earth cover / sun protection cover Further information on page 99 - 105.

Specifications

Bellow		Bellow design			Max. temperature °C	Permissible operating data							
Colour code	Colour marking	Core (inner)	Reinforcement	Cover (outer)		°C	bar	°C	bar	°C	bar	°C	bar
red		EPDM	Polyamide	EPDM	100								
blue		EPDM TW	Polyamide	EPDM	100								
white-red		EPDM beige	Polyamide	EPDM	100								
green		CSM	Polyamide	CSM	100								
yellow		NBR	Polyamide	NBR	100								
white		NBR beige	Polyamide	NBR	100

red-blue-red		EPDM	Aramid	EPDM	100								
blue-blue-blue		EPDM TW	Aramid	EPDM	100								
white-blue-red		EPDM beige	Aramid	EPDM	100								
orange-blue-orange		EPDM HT	Aramid	EPDM HT	120								
green-blue-green		CSM	Aramid	CSM	100								
yellow-blue-yellow		NBR	Aramid	NBR	100								
white-blue-white		NBR beige	Aramid	NBR	100								
grey-blue-grey		CR	Aramid	CR	90								
lilac-blue-lilac		FPM	Aramid	FPM	180								
-	-	Silicone	Aramid	Silicone	180								
-	-	Silicone	Glass fabric	Silicone	200								

Expansion joints will be designed according to your operating parameters.

Important information

For aggressive media, please have the material resistance checked by our engineers. The bellows must not be painted or insulated at media temperatures >50 °C. Please also note the planning instructions.

WILLBRANDT Rubber Expansion Joint Type 59

Application

Type 59 red (EPDM)

For water, sea water, cooling water with glycol or other chemical additives for treating water, saline solutions, weak acids and weak alkaline solutions. Unsuitable for aliphatic, aromatic and chlorinated hydrocarbons, oil or oily media.

Type 59 blue (EPDM TW)

Like type 59 red, but approved for drinking water.

Type 59 white-red (EPDM beige)

Like type 59 red, but with light-coloured internal rubber in food-grade (FDA and EG 1935/2004 conform). Not approved for drinking water.

Type 59 green (CSM)

For chemicals, aggressive, chemical waste water and compressor air containing oil.

Type 59 yellow (NBR)

For oils, fats, gases, diesel fuels, kerosene and crude oil. Not suitable for aromatic and chlorinated hydrocarbons, esters and ketones.

Type 59 white (NBR beige)

Like type 59 yellow, but with light-coloured internal rubber in food-grade (FDA and EG 1935/2004 conform). Not approved for drinking water!

Type 59 grey (CR)

For water, waste water, swimming pool water, salt water, cooling water with anti-corrosive products containing oil, oil mixtures and compressed air containing oil.

Type 59 red-blue-red (EPDM/aramid)

Like type 59 red, but with aramid fabric.

Type 59 blue-blue-blue (EPDM TW/aramid)

Like type 59 blue, but with aramid fabric.

Type 59 white-blue-red (EPDM beige/aramid)

Like type 59 white-red, but with aramid fabric.

Type 59 orange-blue-orange (EPDM HT/aramid)

Like type 59 red, but with aramid fabric for temperatures up to +120 °C.

Type 59 green-blue-green (CSM/aramid)

Like type 59 green, but with aramid fabric.

Type 59 yellow-blue-yellow (NBR/aramid)

Like type 59 yellow, but with aramid fabric.

Type 59 white-blue-white (NBR beige/aramid)

Like type 59 white, but with aramid fabric.

Type 59 grey-blue-grey (CR/aramid)

Like Type 59 grey, but with aramid fabric.

Type 59 lilac-blue-lilac (FPM/aramid)

For flue gas desulphurisation systems and bio-diesel. High chemical resistance to benzene, xylene, toluene, aromatic, chlorinated hydrocarbons, mineral acids and fuels with an aromatic content of more than 50 %. Temperatures of up to +180 °C.

Type 59 silicone (silicone/glass fabric or aramid)

Suitable for hot air, acetic acid. Satisfactory resistance to aliphatic engine and gear oils. Also available in foodstuff quality. Excellent resistance to ageing, UV, ozone and weather. Very good radiation resistance. Not for use with steam above 120 °C. No resistance to fuels.

Important information

Please note the appropriate fixed point constructions and plain bearings in your piping system, as well as the tolerances as per the FSA Handbook (see the technical appendix on page 117)! You can find information on this in our planning instructions (page 107 - 117).

WILLBRANDT Rubber Expansion Joint Type 59

Design A - concentric, without tie rods

Can be used to absorb compression and lateral movement, as well as to absorb vibration and insulate sound.

Can only absorb minimal expansion.

Dimensions for design A, concentric

DN1	DN2	Length BL	Bellow WF*	Movement absorption	
				axial - mm	lateral ± mm
350	400	300	125600	4	7
350	500	350	196250	10	12
400	500	400	196250	7	8

1500	1600	400	2009600	10	6

* WF = effective area

- Table values correspond to a bellows design with 6 bar operating pressure at 60 °C.
- Other flange connection dimensions available on request.
- Special lengths and nominal diameter are possible in individual cases.

Bracings

It is advisable to use tie rods / shear limiters on these expansion joints (Design M - see illustration). The conical bellows is inflated by the rise in pressure, which shortens the expansion joint and applies high tensile force to the connections.

It is also available with tie rods only (design E).

WILLBRANDT Rubber Expansion Joint Type 59

Design A - eccentric, without tie rods

Can be used to absorb compression and lateral movement, as well as to absorb vibration and insulate sound.

Can only absorb minimal expansion.

Dimensions for design A, eccentric

DN1	DN2	Length BL	Bellow WF*	Movement absorption	
				axial - mm	lateral ± mm
